Subject: RE: URGENT: ISSUE RAISED BY BRENDA IN CEPD - PEOPLE MAY BE DRINKING WATER FROM SOME OF OUR SF SITES

Thanks all. This will need to be a coordinated action within the response structure. With the CEPD office now open, and as our ground operations have expanded, we've been moving towards inclusion of Brenda in the response structure and considering the best options for how to make that happen. Seems like this would be a good point to figure out the integration. Also, that of the Asst. PIOs for Comm Relations in the REOC and in the San Juan JFO.

Importance: High

Janie and Rusty and Pat,
[Note to Janie and Rusty: Brenda does public affairs and community work for our Caribbean Environmental Protection Division] See her note below. I am cc:ing Walter for awareness.

Can one of you please report this to REOC Ops immediately? I don't know if the water from these wells poses a short-term risk, but I leave it to our experts to figure out how to stop people from drinking the water from these wells.

Media outreach and flyers may well be needed too, as Brenda notes, but I think the first step is to get Ops involved. They might be able to install some security at the sites, if appropriate.

Subject: URGENT MEDIA COMMUNITY ISSUE

It came to our attention this afternoon that one of the teams assessing Superfund sites found out that residents tampered the well in Caguas Hormigas Superfund site and are using it to extract water. The winds took out all signs in this Superfund sites. Upon making a few phone calls we found that in the wells in Dorado Superfund site water was extracted on Friday, Saturday and Sunday and our CDM contractor confirmed that a resident of Maunabo had requested to use the water at the wells in the site.

Yesterday I had told CEPD Director that my most pressing concern was the use of water in the San Germán Superfund site where we have an unknown number of wells that were dugged in 1975 after Hurricane Eloise, when residents were without water for many months. These Superfund sites have VOC's and are at different stages in the process.

I strongly suggest we make a media pitch on radio and print with CEPD director urging people no to tamper these wells or use that water, work to have signs up ASAP, make flyers that can be distributed house to house and within the communities and the neighborhoods. This is an URGENT matter.

Please contact Carmen and/or myself.
